# C2 Coating System

**Coating type:** Water-based single-coat acrylic paint  
**Characteristics:** Anti-corrosion coating for low corrosion stress  
(to C2 M in accordance with DIN EN ISO 12944-2)  
**Colour:** RAL 1007 daffodil yellow  
**Scope of application:** externally:  
Atmospheres with low contamination and a dry climate.  
Mostly rural areas  
internally:  
Unheated buildings in which condensation can occur, e.g. warehouses, gymnasiums, production halls, exhibition halls and cellar rooms.  
**Protection period:** (L) Low up to 7 years  
(M) Medium 7 – 15 years  

## Processing Information

**Dry layer thickness:** Single coat 100 µm top coat  
**Ambient temperature:** at least +10 °C, optimally at 15 to 20 °C  
**Relative humidity:** max. 75%  
**Object temperature:** at least +10 °C and min. 3 °C above the dew point
